Title: Arizona ranks among worst for school zone safety

People Involved: Zendrive

Summary:

Zendrive is a software that collects data from many phone apps. These phone apps record speeds, phone use, and much more information. Zendrive has recorded Arizona as being a very dangerous place for children due to all the information collected. However, after some research, California is the most dangerous state and Arizona ranks 45th. This is very bad and Zendrive is offering \$50,000 to improve safety.

Title: School district decision to arm teachers brings backlash

People Involved: Schuylkill County school board

Summary:

In Tamaqua, Pennsylvania, teachers are allowed to carry firearms with them in case of an active shooter. As a benefit, you also get a bonus \$2,000 and an extra \$250,000 insurance. However, most teachers are against the policy of allowing staff the carry guns. The staff will also have to go through training for their weapons and they might not want to go through the hassle.

Title: SRP, Intel agree to collaborate on Arizona solar plant

People Involved: Intel, sPower, Marty Sedler, Mike Hummel, and Salt River Project

Summary:

Sixty miles south of Phoenix, Intel is sponsoring a solar power plant, in hopes that the plant will be able to power Intel's Ocotillo Campus on South Chandler, which is one of the biggest semiconductor manufacturing sites. Marty Sedler states that this would help their portfolio and support a greener planet. CEO Mike Hummel states that this would be a great example between utilities and business customers can work together.
